

August 20, 2007

Dear Friends,

Valet Waste has become a partner to Camden and has helped us in many ways deliver excellence to our residents, employees and share holders. We will continue to add communities to their program.

The Valet Waste concept is awesome, the executive team, sales team and property personnel are wonderful.

The company has vision into the world of property operations. They provide a service that is efficient, professional and revenue generating.

The reason this organization is our "partner" is their flexible approach to issues and concerns. I truly enjoy working with folks that listen to their customer and can make things happen.

I have had the opportunity to work with Valet Waste on several communities with different clientele, construction, waste issues and revenue goals. The Valet Waste team and service product were customized for each community based on the above goals and objectives.

Regardless of your community's profile, location or ownership Valet Waste will add an amenity to your customers, less work for your employees and revenue for your owners.

The waste issues at my communities have been eliminated, the residents are happy and I am making money. There is no reason to wait, just do it.

Please feel free to call me with questions or a personal reference at 713-354-2500.

I love these guys.

Thanks,
