recycled paper

There's no better time than now to call us and find out how Valet Waste can tailor a program to help you meet your environmental goals. We have many resources that make us a turnkey solution for your sustainability needs. From our unique doorstep recycling collection to dumpster to compactor conversions, we can save you money on your waste expenditure, guaranteed!

DOORSTEP RECYCLING COLLECTION

In addition to our world class doorstep trash collection, we've added a clean and convenient way for your residents to participate in a recycling program.

- Paper and cardboard is collected at no extra charge
- Co-mingled programs available (glass, plastic, aluminum)
- Recycle bins provided

Some of the biggest issues facing recycling in the multi-family industry are contamination and low rate of resident participation. With a Valet Waste program in place, those concerns won't be an issue because we collect the recyclables and it's convenient for the residents.

DUMPSTER TO COMPACTOR CONVERSION

Dumpsters cost you a lot more than you think! In the long run converting multiple dumpsters to a central compactor saves you money.

- Reduce noisy hauler truck visits to your property to once a week or twice a month (average property)
- Create additional parking spots and increase curb appeal
- Hauler trucks are heavy! You can see significant soft cost savings by reducing your asphalt and curb repair expenses.

Valet Waste is committed to helping multi-family communities go green! Reducing your community's negative impact on the environment is the right thing to do. We can help you get there.
